ELEVATOR DESIGN BOOK: SYNERGY AND EVOLUTION

MOVE BEYOND

DESIGN PHILOSOPHY

We have turned our elevators into an architectural design element, providing users with a great TK Elevator ambiance they can see and feel.

The new design collection for synergy and evolution elevators offers a wide range of attractive styles and moods. Perfect, down to the detail. Every single element reflects our commitment to creating the optimum ride experience.

From functional, robust cabin interiors to a luxurious look and feel: all design elements speak a clear language and provide exceptional quality. Our many combination possibilities allow you to select a design that perfectly meets your individual taste and needs.

About us

synergy and evolution

Our synergy and evolution elevators combine state-of-the-art technology with flexible design. Immerse yourself in the design world of these two elevator families and choose the design that suits your taste and requirements.

synergy

With its compact dimensions, the synergy series is perfect for low-rise buildings with low- to mid-level traffic requirements. synergy combines simplicity with appealing design and durability to provide comfortable, reliable mobility at a competitive price. This elevator family has been successfully established on the market for over a decade. The proven technology and optimised layout helps to save costs and energy. synergy is the intelligent solution for residential buildings and low-duty commercial buildings.

evolution

Our future-oriented evolution series is perfect for mid-rise buildings with mid- to high-level traffic requirements. This versatile, robust and spatially efficient elevator family features best-in-class technology for excellent performance and superior ride comfort. Its advanced, modular design concept features an extensive range of colours and materials that can be freely interchanged and adapted to your specific vision and needs. evolution is the solution of choice for commercial applications and premium-class residential buildings.

Design line architecture

Our synergy and evolution elevators feature 6 design lines, which are named with letters from “F” to “A”. “F” indicates a more functional, robust design line, whereas “A” portrays the premium designs. Our designers have developed predesigned cabins in various ambiances for each design line. In addition, the comfort and premium design lines offer the opportunity to configure cabins according to your individual taste – truly custom fit.

Predesigned cabin or cabin-fit solution?

Predesigned cabins

With our predesigned cabin interiors (see examples on the following pages), we make it easy for you to create your desired atmosphere. Our design experts have incorporated years of experience into the development of our more than 100 different cabin interiors. To make your choice even easier, you will find a choice of cabins grouped by ambiances within each design line. In the predesigned cabins, the combination of wall materials and colours are specified. But you are free to choose elements such as ceilings, floors, cabin and landing fixtures, handrails and other elements within your selected design line.

Custom-fit solutions

In addition to the predesigned cabins, the design Lines A, B, C, D and E give you the opportunity to design the interior of your elevator according to your own wishes. There are several ways to do this:

Custom selection

You can individually select all materials within your chosen design line for the rear wall, COP wall or opposite COP wall. In addition, you can choose a ceiling, floor and skirting, handrails and COP.

Custom printed glass

Customise the walls of your elevator with glass walls in the colour of your choice or with an image that is digitally printed onto the glass wall.

Custom cabin

With this option, you get a cabin equipped only with a ceiling and a COP from your chosen design line. You are then free to choose your own floor, if you wish, and can also equip the cabin with your own wall finish and skirting.

Panoramic cabin

There are 2 options to provide your passengers with a good view from the cabin: you can either choose a 3-sided panoramic cabin with stainless steel frames or just a panoramic glass rear wall.

Predesigned cabin: F22
Ambiance: Fresh
Ceiling: Slim LED
Walls: Skinplate Beige
Floor: Vinyl, Concrete Dark Grey
COP: Moon, Stainless steel

Predesigned cabins

The F design line combines timeless, clean designs with attractive and durable materials. Neutral colours, as well as long-lasting stainless steel finishes are the ideal choice for functional buildings. This design line presents predesigned cabin interiors in the ambiance styles “Fresh” and “Timeless”.

Fresh

F20 SK01/SK01/SK01

F21 SK04/SK04/SK04

F22 SK02/SK02/SK02

F23 SK07/SK07/SK07

Timeless

F30 ST01/ST01/ST01

F31 ST02/ST02/ST02

Legend: The descriptions next to the cabin names specify the wall materials for each predesigned cabin, facing the COP wall/rear wall/COP wall. All wall materials are on page 11.
Note: For your vandal-resistant options please refer to the vandal-resistant chapter at the end of the brochure.

Wall materials

The 6 predefined cabins of the F design line have walls made of stainless steel (brushed or linen) or coated steel skinplate. Choose the combination that best suits your building.

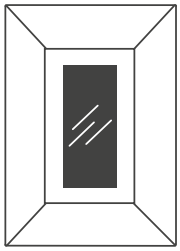
Legend:
SK: Skinplate
ST: Stainless steel

Mirrors, skirting and handrails

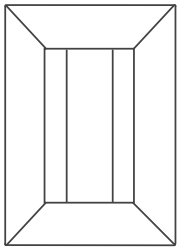
Mirrors

A mirror in 5 mm tempered safety glass is included on the rear wall, or on the side wall for elevators with a double entrance. Mirrors make the cabin feel more spacious and create appealing ceiling light reflections.

Option



Partial-width and partial-height



Without mirror

Skirting

Protect your walls with aluminum skirting on the side and rear walls, on top and bottom of the cabin.

Anodised aluminum, Silver

Handrails

The handrails can be mounted on opposite to COP wall or on three walls to meet accessibility requirements. Standard finish in chrome-plated aluminum, optionally in brushed stainless steel.

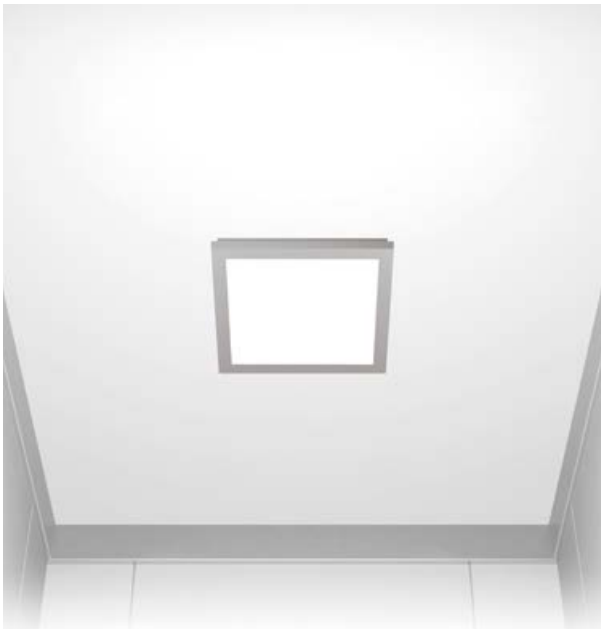
Chrome-plated aluminum, straight fixing

Stainless steel satin, straight fixing

Ceiling and floors

Ceiling

The F design line includes a structural white painted ceiling that enhances the reflection of light from the slim LED panel light to provide comfortable, uniform lighting.



Slim LED plate

Floors

Hardwearing, easy-to-clean vinyl in a choice of three colours. You also have the option to supply your own flooring.

Vinyl flooring

1 Nature Black FV10
2 Concrete Chalk FV11
3 Concrete Dark Grey FV02

Door finishes

Choose your material

The doors are supplied in different finishes. In the F design line, the standard finish for cabin doors is stainless steel Gr.220. As an option, you can choose stainless steel with Linen finish. The landing doors are available with primed painted (RAL 7032) finish or the option of stainless steel Gr.220 or stainless steel Linen.

E DESIGN LINE

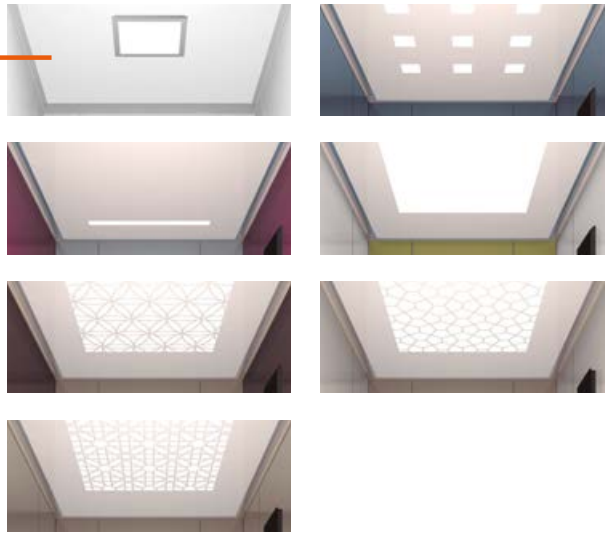
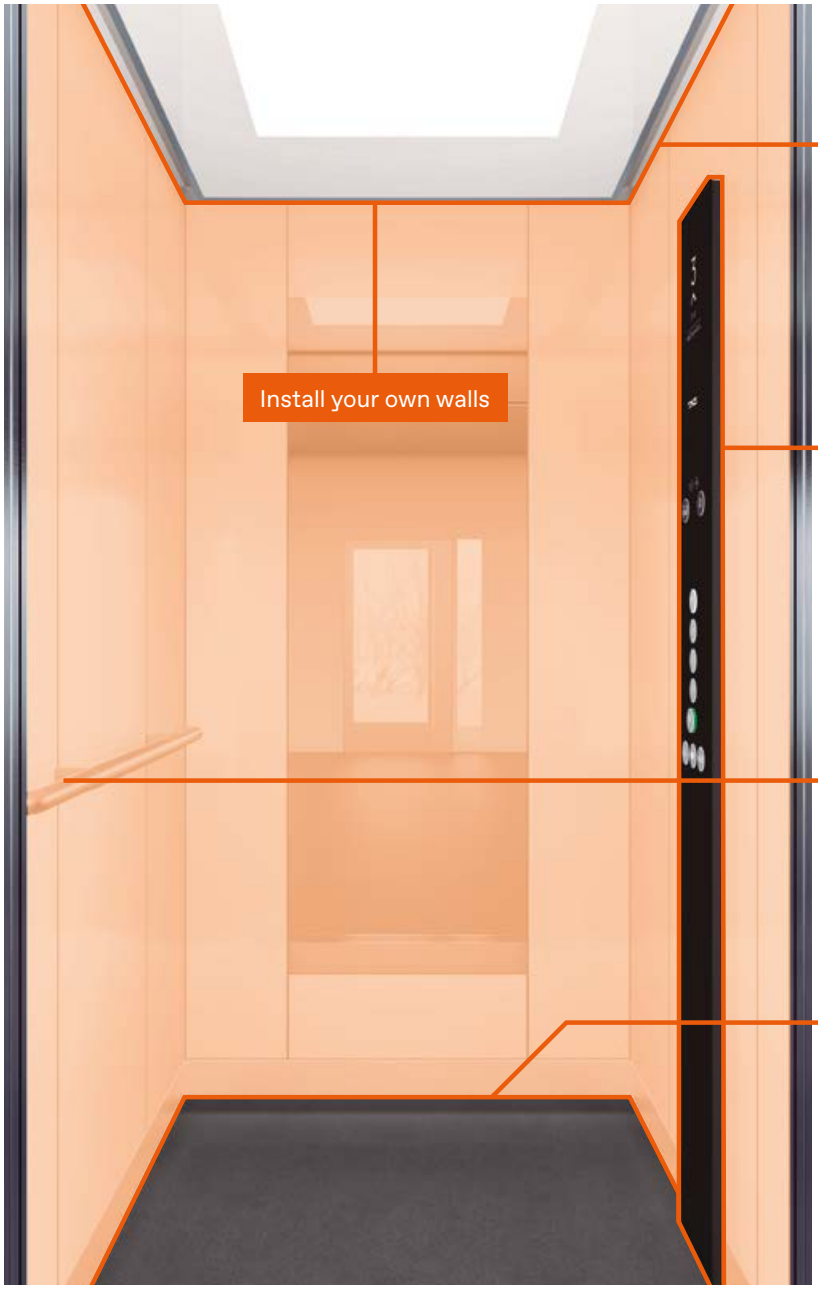
Rear wall
Mirror
Operating panel
Skirting
Floor



Custom-fit solutions: custom cabin

The E design line for synergy 200 offers a custom cabin option. That means, if you prefer to personalise the cabin walls yourself, we can fulfill your needs by delivering a cabin with no wall finishes.

Choose the ceiling design and car operating panel from the E design line and optionally complete your cabin with handrails and flooring from the same design line.



Choose a ceiling from the E design line

Choose a COP from the E design line

Choose either a handrail from the E design line or install your own handrail

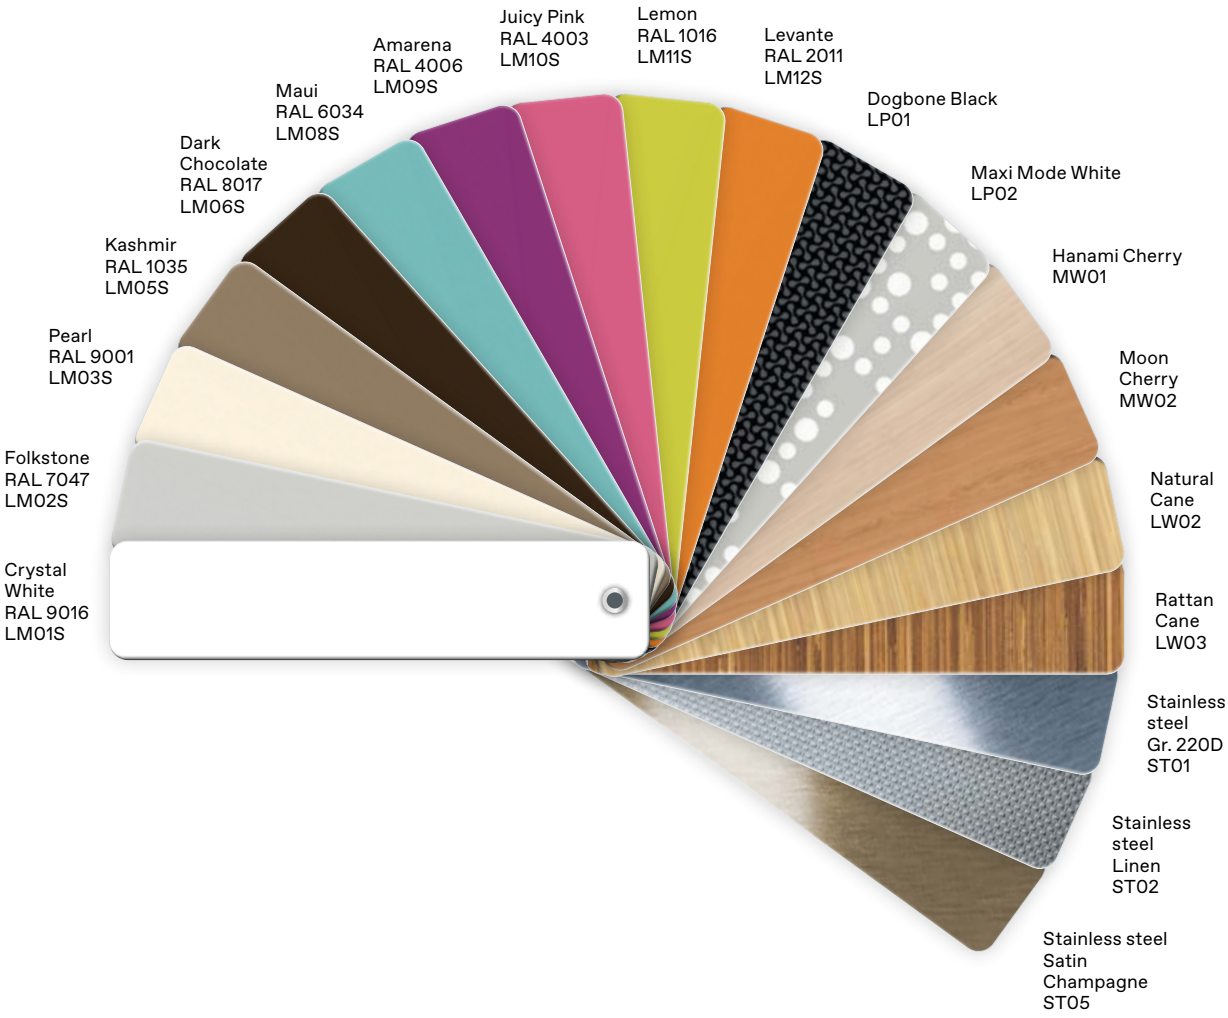
Choose either flooring from the E design line or install your own flooring

This option is available for the E design line in synergy 200.

Cabin example:
Predesigned cabin: E33
Ambiance: Sharp
Ceiling: Grille
Walls: Brushed stainless steel
Floor: Custom flooring supply
COP: Edge

Wall materials

Choose from a full palette of different colours and materials. Full stainless steel (brushed, linen or satin champagne), laminates and melamines in colourful or wooden optics create a special atmosphere in your cabin.



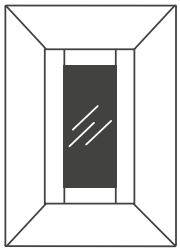
Legend:
LM_S: Laminate shiny, plain colour
LP: Laminate pattern
LW: Laminate wooden
MM_M: Melamine matt
MW: Melamine wooden
ST: Stainless steel

Mirrors, skirtings and handrails

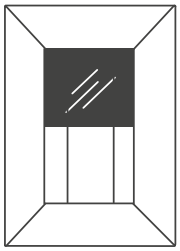
Mirrors

A wide silver mirror, integrated into the rear or side wall in case of double boarding, enhances the feeling of space inside the cabin and creates appealing ceiling light reflections. All cabins of the E design line are equipped with a partial-width and partial-height silver safety mirror, but you can also choose a cabin without mirror.

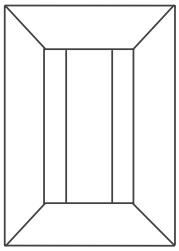
Options



Partial-width and partial-height



Full-width, mid-height



Without mirror

Skirtings

The anodised aluminum skirting provides wall panels with long-lasting, high-quality finishes while complementing the decorative theme with the elegance of a steel look. Anodised aluminum in the finishes silver and champagne.

Anodised aluminum, Silver

Anodised aluminum, Champagne

Handrails

Strong stainless steel handrails can be placed on rear and side walls (standard on the COP opposite wall). Available in silver or black.

Stainless steel Satin Silver, straight fixing

Stainless steel Satin Black, straight fixing

Ceilings

The E design line offers a variety of ceiling options, from a slim LED plate to a selection of false ceilings with white printed designs in the central area.

LED lighting plate

Grille

Rocket

Lightbox

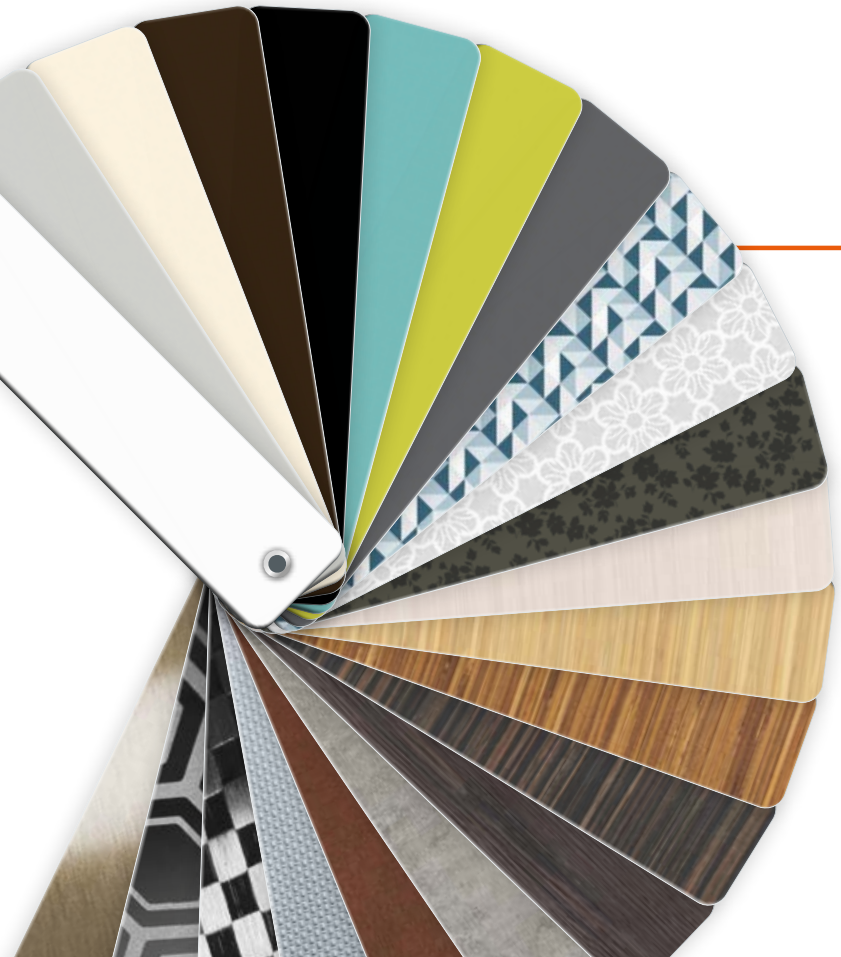
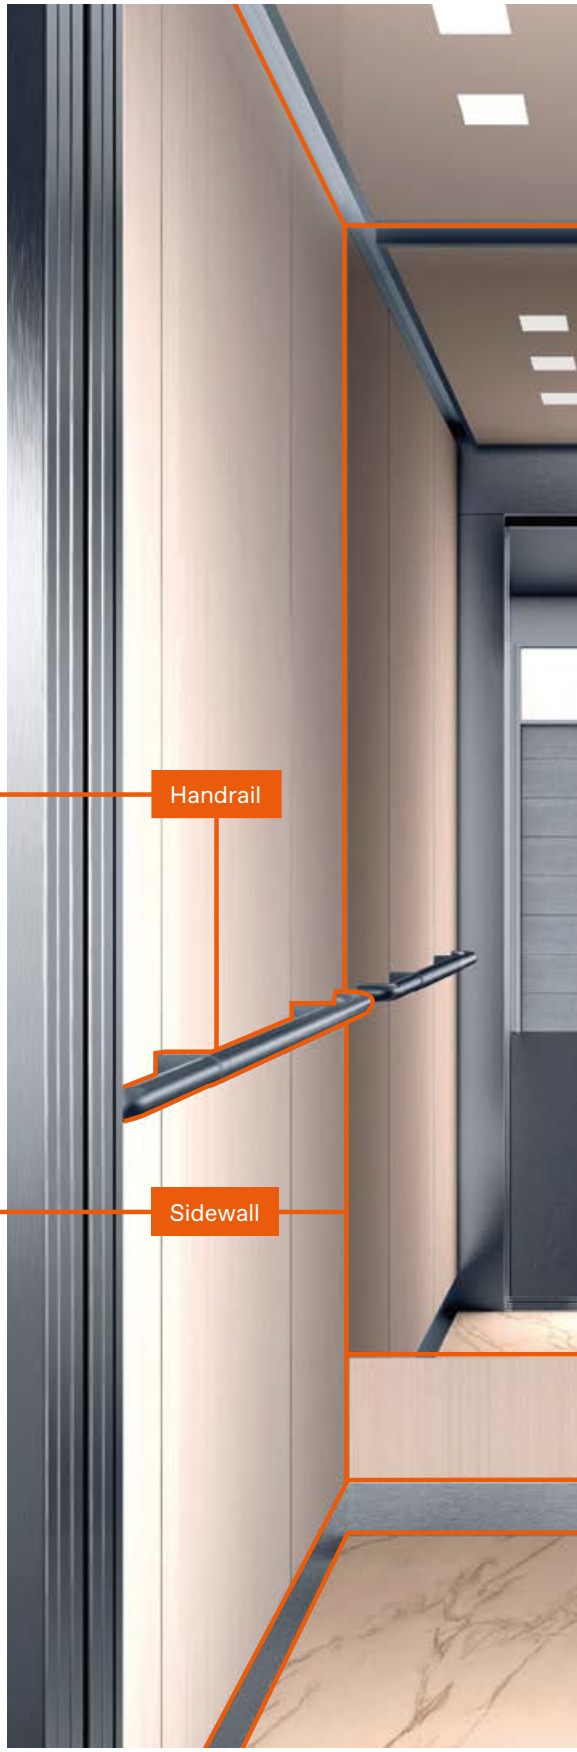
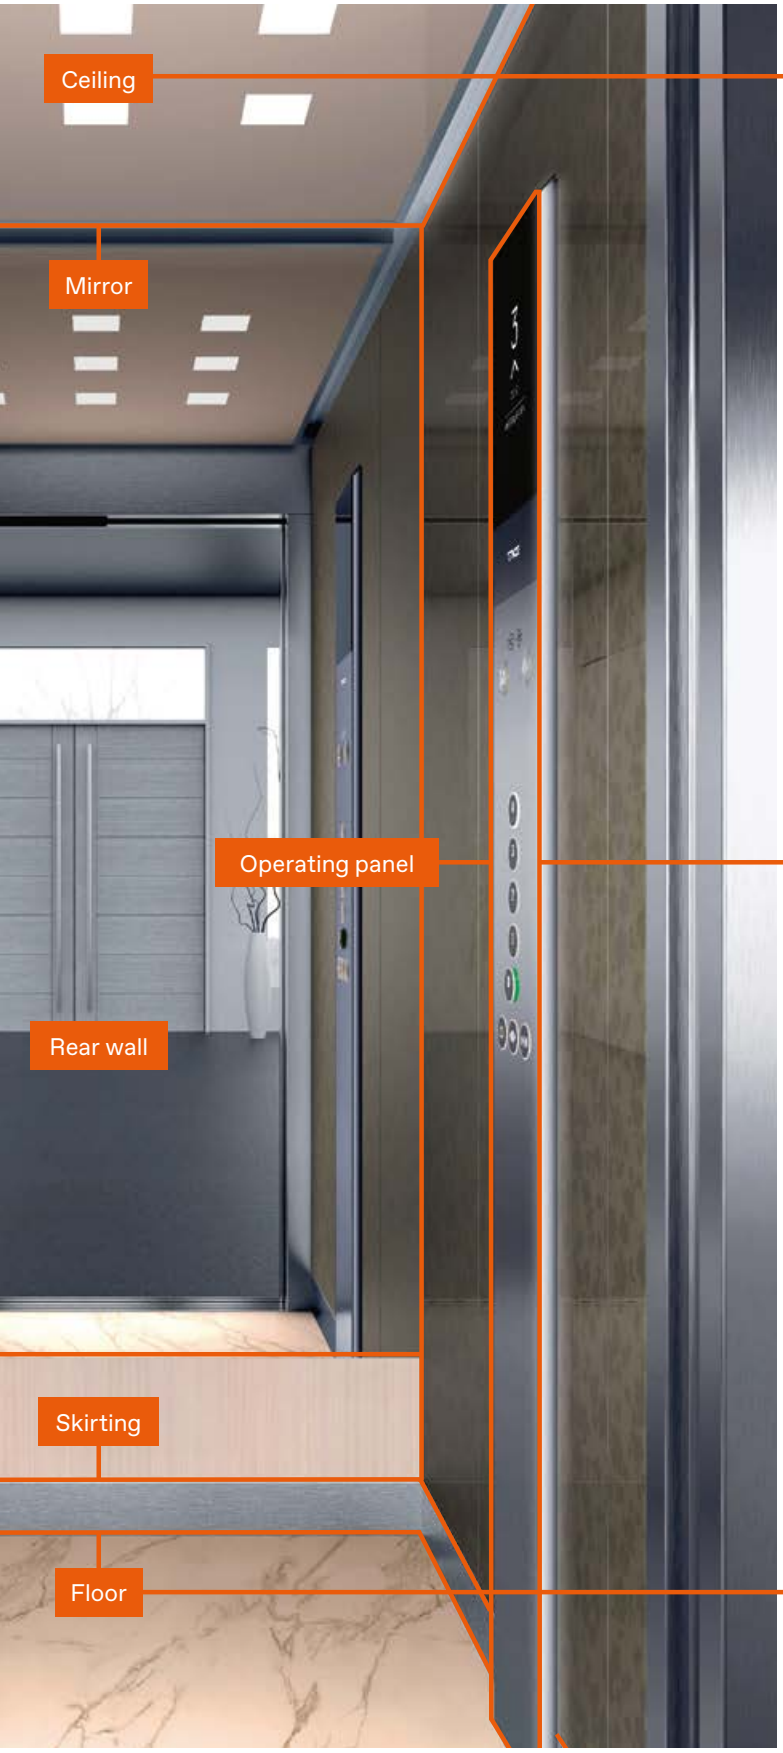
Custom-fit solutions: custom selection

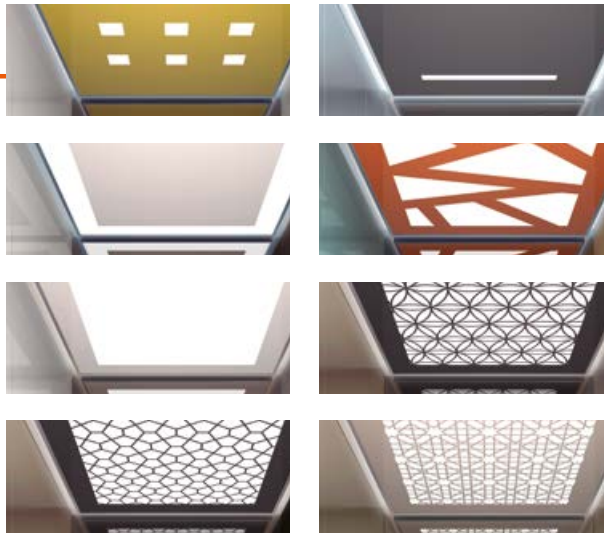
You can individually select all materials within your chosen design line for the rear wall, COP wall or opposite COP wall. In addition, you can choose a ceiling, floor and skirting, handrails and COP.





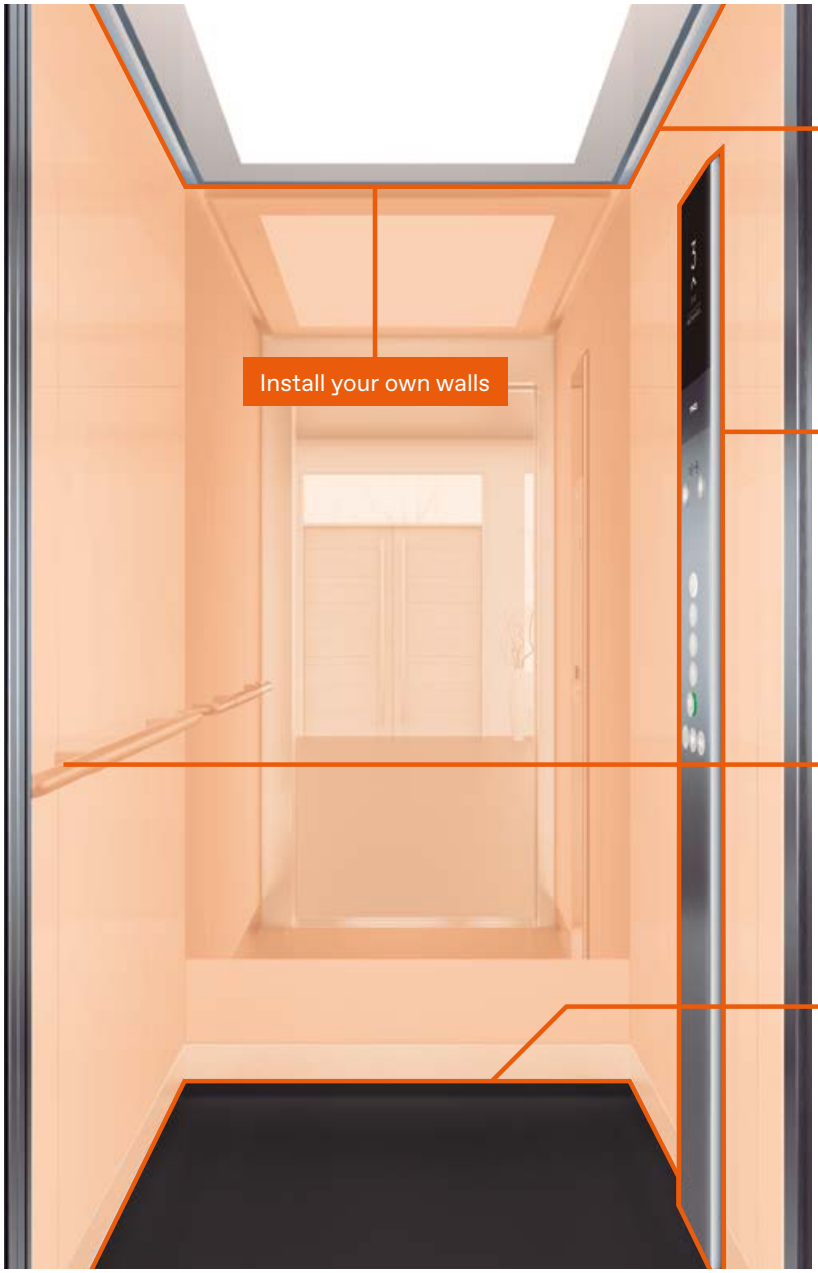


Ceiling
Mirror
Operating panel
Rear wall
Skirting
Floor



Custom-fit solutions: custom cabin

The D design line for synergy 200 offers a custom cabin option. If you prefer to personalise the cabin yourself, we can also fulfill your needs by delivering a cabin with no wall finish. Choose the ceiling design and cabin operating panel within your preferred design line and optionally complete your cabin with handrail and flooring.



Choose a ceiling from the D design line

Choose a COP from the D design line

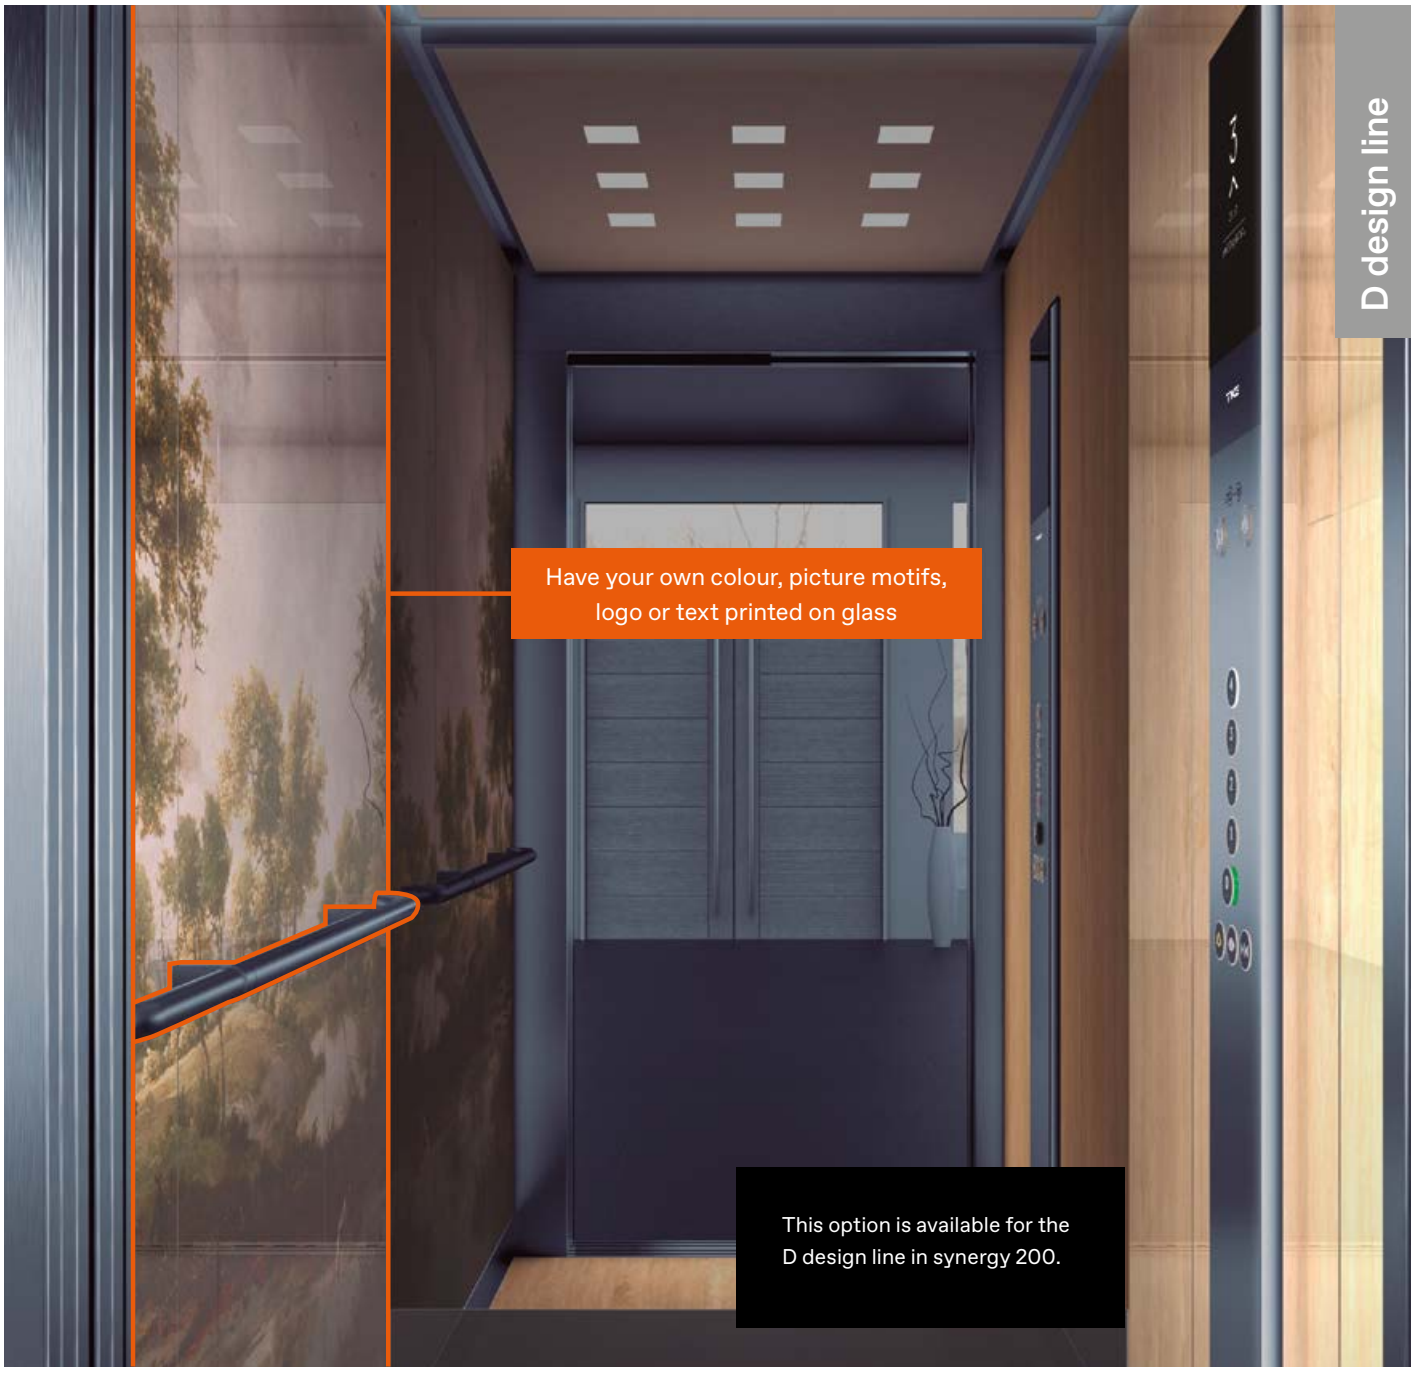
Choose either a handrail from the D design line or install your own handrail

Choose either flooring from the D design line or install your own flooring

This option is available for the D design line in synergy 200.

Custom-fit solutions: custom printed glass

Customise the walls of your elevator with glass walls in the colour of your choice or with an image that is digitally printed onto the glass wall. This lets you take advantage of the opportunities the elevator offers for showcasing your brand. We bring your ideas to life. Consult your TK Elevator sales representative for detailed information on custom printed glass designs.



Wall materials

Choose from a full palette of different colours and materials. Stainless steel in four different finishes, colourful or wooden laminates, glass: the D design line provides high-grade materials for impressive design.

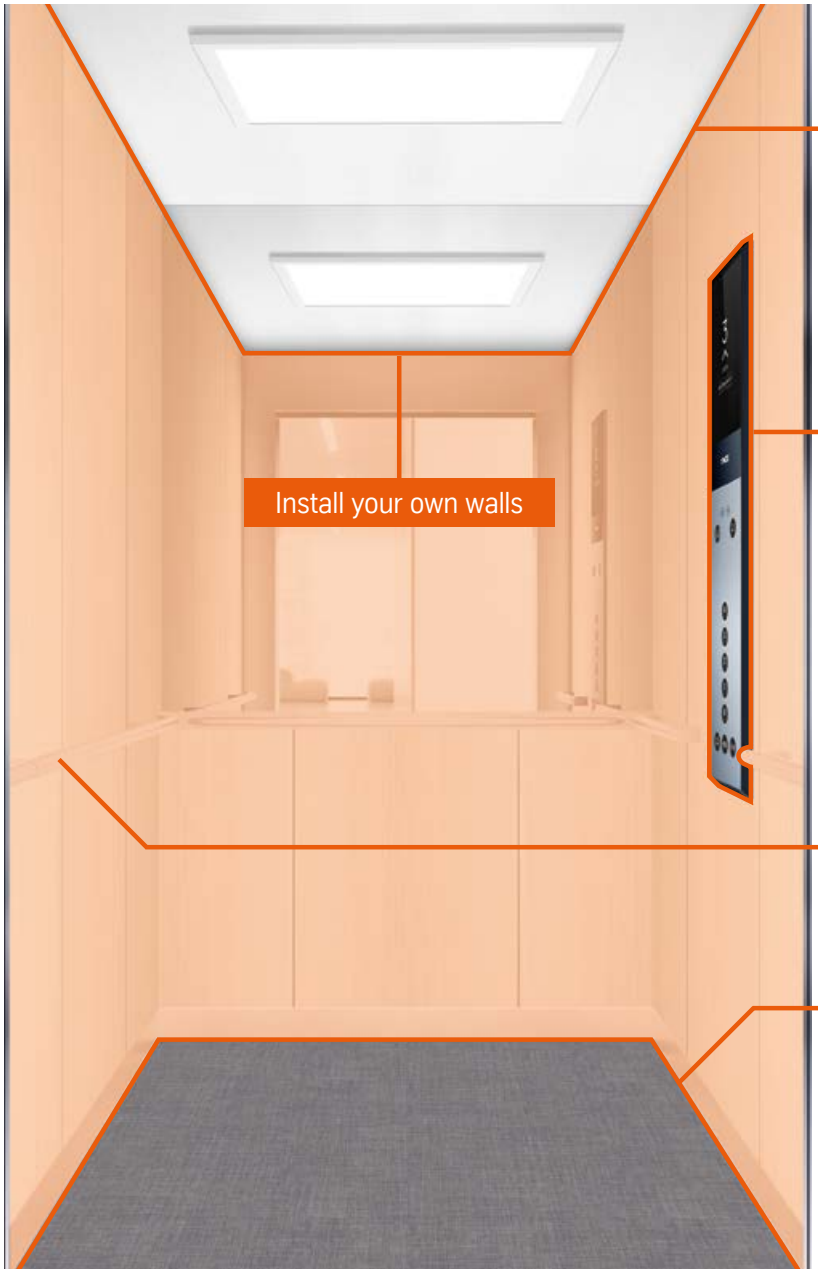
Custom-fit solutions: custom cabin

The C design line for evolution 100, evolution 200 and evolution 300 offers a custom cabin option. That means, if you prefer to personalise the cabin walls yourself, we can fulfill your needs by delivering a cabin with no wall finish. Choose the ceiling design and car operating panel within the C design line and optionally complete your cabin with a handrail and flooring from the same design line.



Choose a ceiling from the C design line

Choose a COP from the C design line

Choose either a handrail from the C design line or install your own handrail

Choose either flooring from the C design line or install your own flooring

This option is available for the C design line in evolution 100/200/300.

Custom-fit solutions: panoramic rear wall and full panoramic cabin

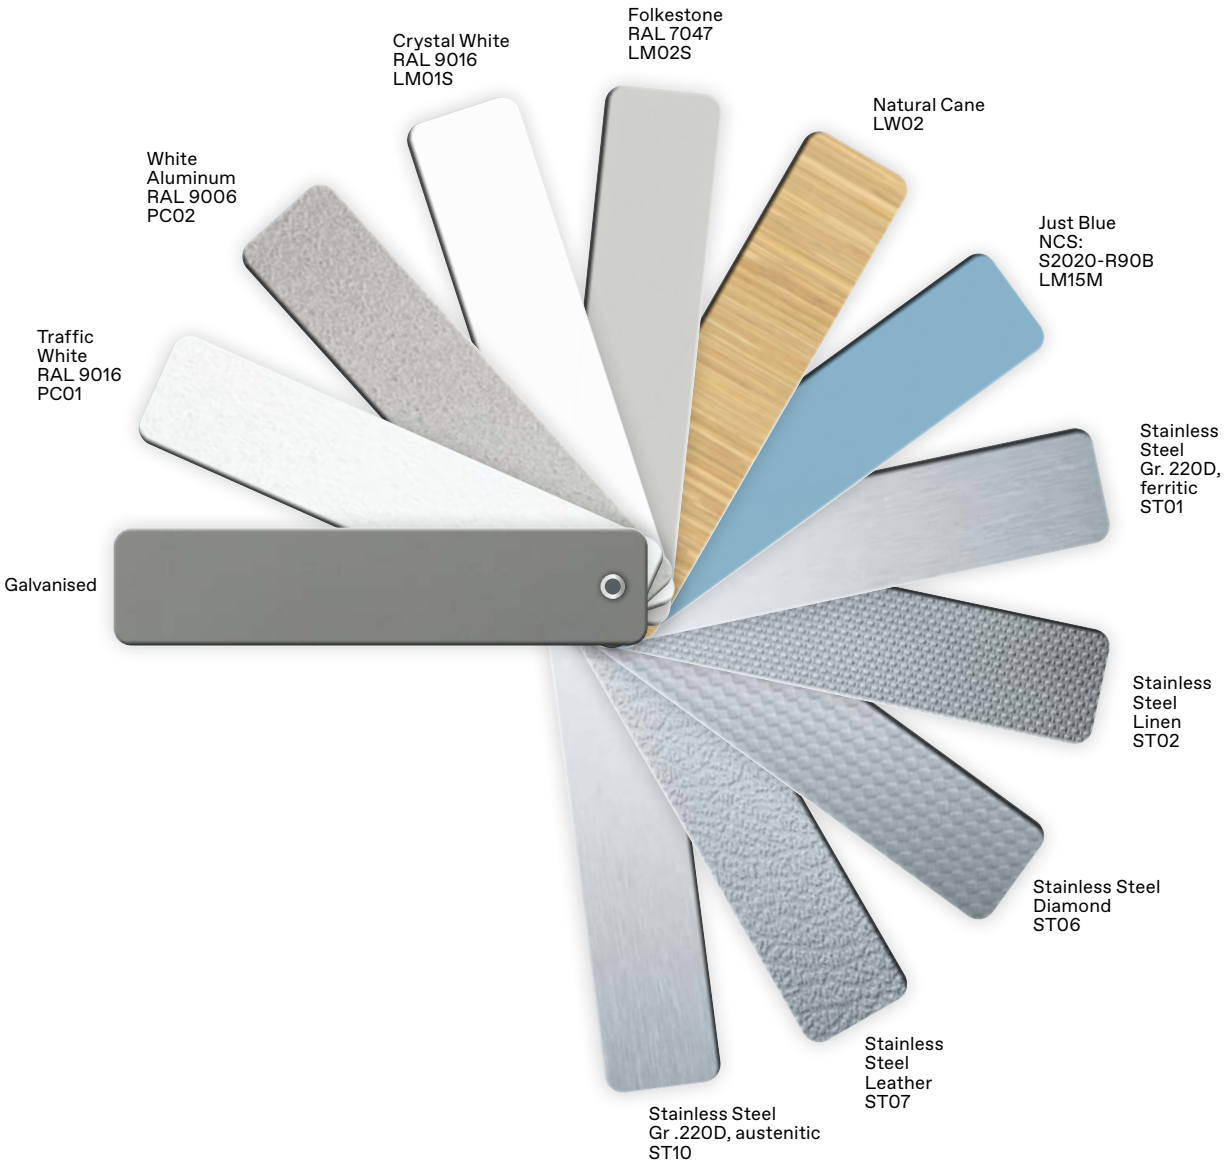
Enlarge your views with a panoramic rear wall, always combined with the elegance of stainless steel frames. A panoramic rear wall gives the cabin spaciousness and allows natural light to enter.

Full panoramic cabins have 3 glass walls combined with elegant stainless steel frames. All-round visibility, brightness and optical enlargement of the cabin – the advantages speak for themselves.

Within the C design line the panoramic rear wall is available for evolution 100/200/300.
The full panoramic cabin is available for evolution 200/300.

Wall materials

Choose from 4 different laminates, 4 stainless steel finishes, powder coatings or galvanised walls. The walls of the C design line are robust and easy to clean.



Legend:

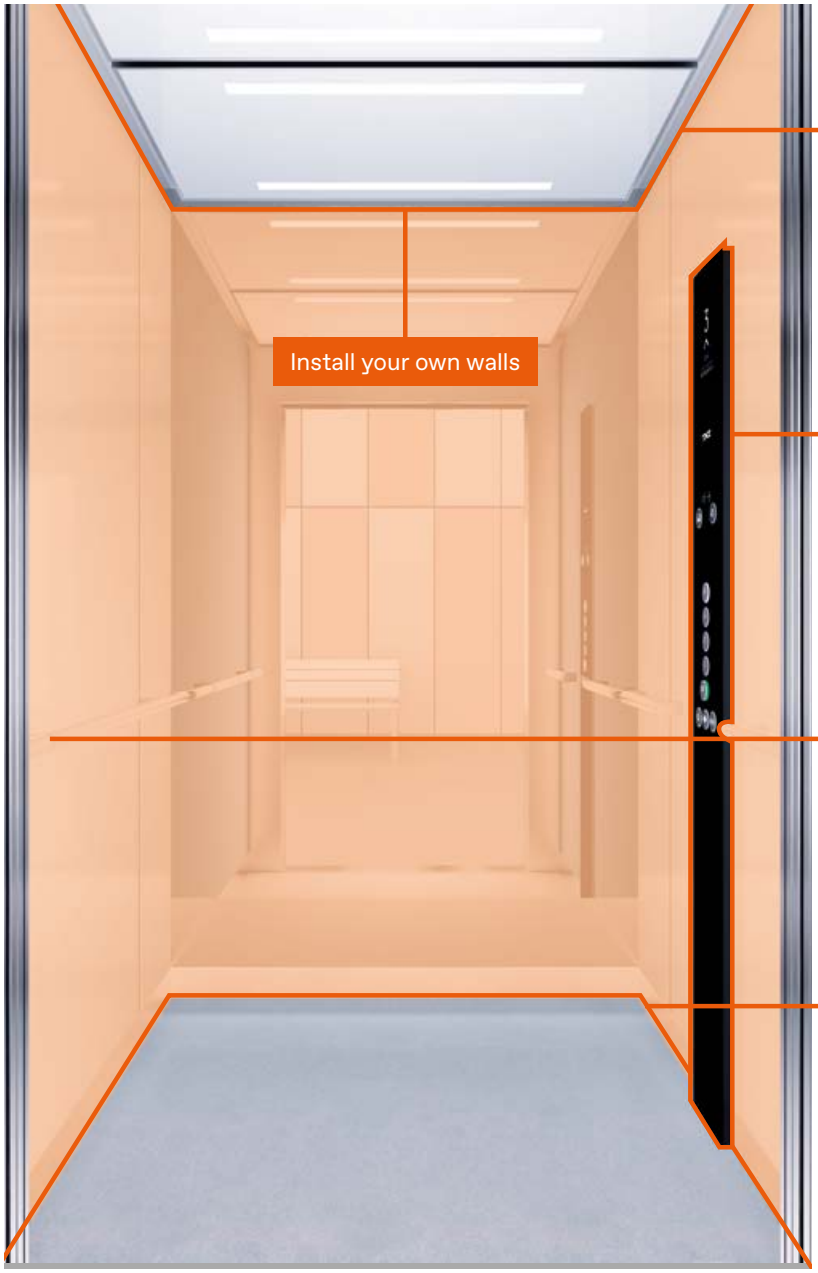
That means, if you prefer to personalise the cabin walls yourself, we can fulfill your needs by delivering a cabin with no wall finish. Choose the ceiling design and car operating panel within design line B and optionally complete your cabin with a handrail and flooring from the same design line.



Choose a ceiling from the B design line

Choose a COP from the B design line

Choose either a handrail from the B design line or install your own handrail

Choose either flooring from the B design line or install your own flooring

This option is available for the B design line in synergy 300 and evolution 200/300.

Custom-fit solutions: panoramic rear wall and full panoramic cabin

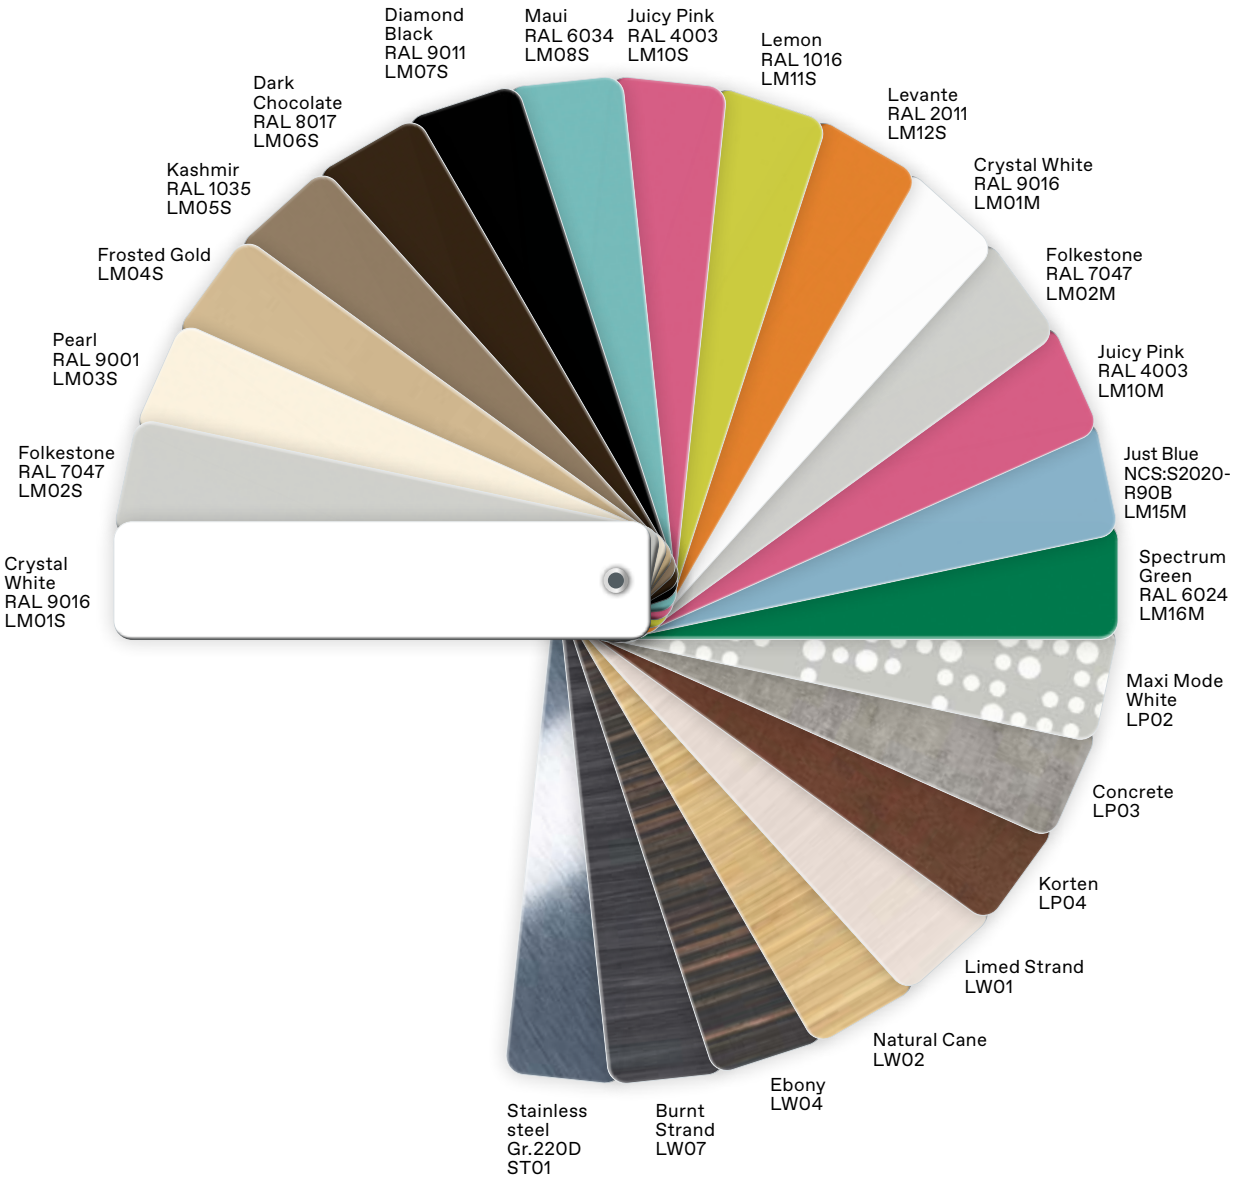
Enlarge your views with a panoramic rear wall, always combined with the elegance of stainless steel frames. A panoramic rear wall gives the cabin spaciousness and allows natural light to enter.

Full panoramic cabins have 3 glass walls combined with elegant stainless steel frames. All-round visibility, brightness and optical enlargement of the cabin - the advantages speak for themselves.

Within the B design line the panoramic rear wall and full panoramic cabin are available for evolution 200 and 300. For synergy 300, a panoramic rear wall is available.

Wall materials

The decoration panels for the walls add colour and character to your cabin. The B design line offers a variety of materials and colours to create your very own atmosphere.



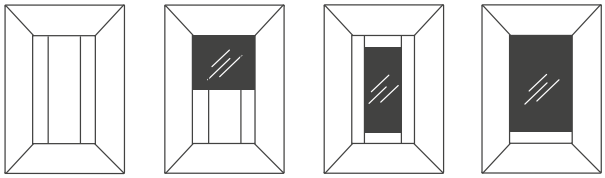
Legend:
LM_S: Laminate shiny, plain colour
LM_M: Laminate matt, plain colour
LP: Laminate pattern
LW: Laminate wooden
ST: Stainless steel

Mirrors, skirtings, handrails and bumpers

Mirrors

Integrated mirrors in the rear or side walls in case of double entrance, make the cabin feel more spacious and create appealing ceiling light reflections.

Options



Without mirror | Full-width, mid-height | Partial-width, partial-height* | Full-width, full-height

*Exclusively available for evolution

Skirtings

The skirting provides wall panels with long-lasting, high-quality finishes while complementing the decorative theme with the elegance of steel or aluminum. Aluminum for synergy, stainless steel for evolution.

Aluminum/Stainless steel, Silver

Stainless steel, Black

Aluminum/Stainless steel, Champagne

Handrails

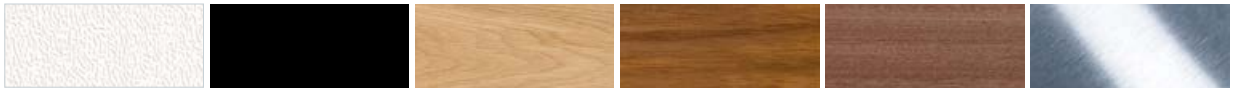
Stainless steel Satin round tubes with curved ending. Silver or black steel colour finish.

Stainless steel Satin Silver, straight fixing

Stainless steel Satin Black, straight fixing

Bumpers

Protect your cabin walls with bumpers in PVC, stainless steel or wooden material.



PVC Snow White | PVC Black* | Wooden European Oak | Wooden Bosse Cedar* | Wooden Sapelly | Stainless steel Gr.220D

*Exclusively available for evolution

Ceilings

The B design line offers a variety of ceiling options with white printed designs in the central area. Different designs for different atmospheres: the Runaway design is especially suited for bed elevators, Rocket for minimalist lighting in calm, quiet spaces and Lightbox for high lighting requirements. Water Lily, Tiffany and Agrabah bring a touch of distinction with amazing lighting effects.

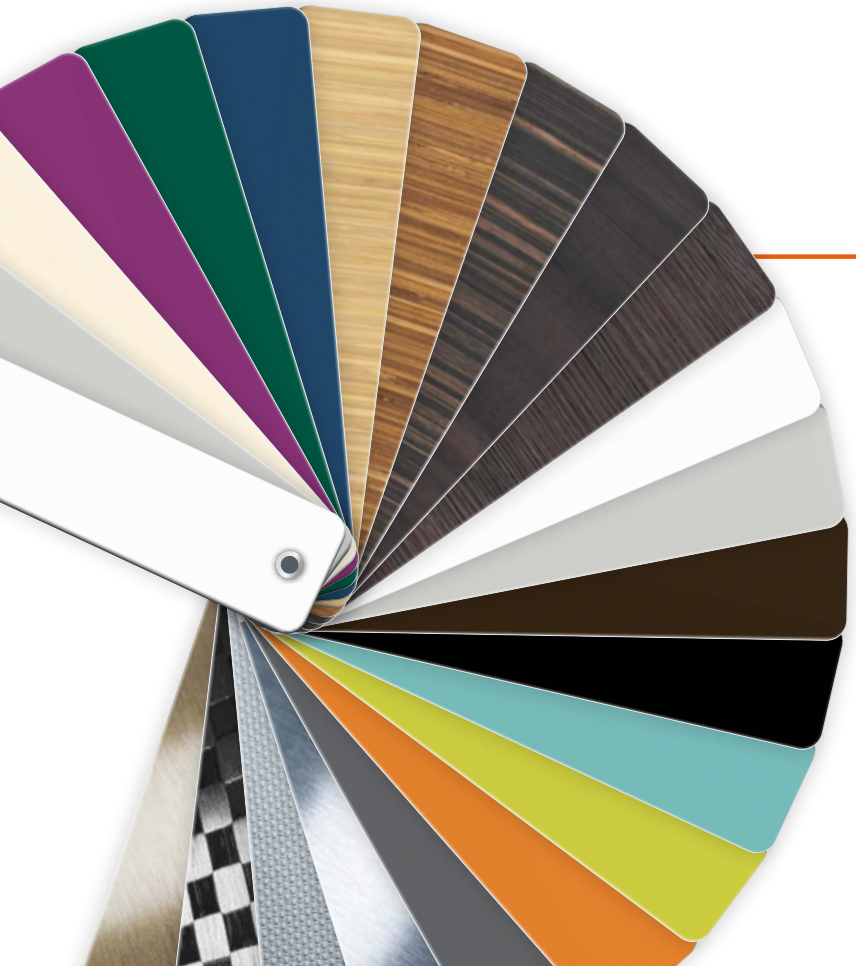
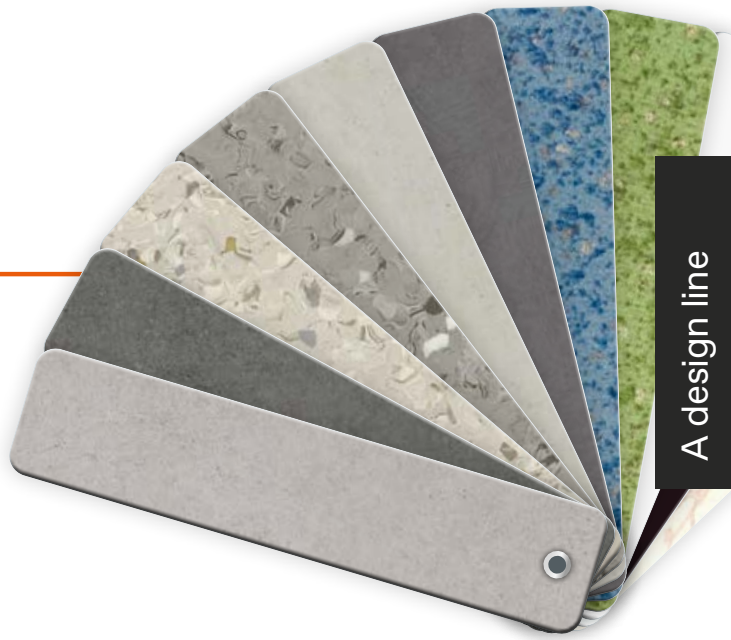
Custom-fit solutions: custom selection

You can individually select all materials within your chosen design line for the rear wall, COP wall or opposite COP wall. In addition, you can choose a ceiling, floor and skirting, handrails and COP.



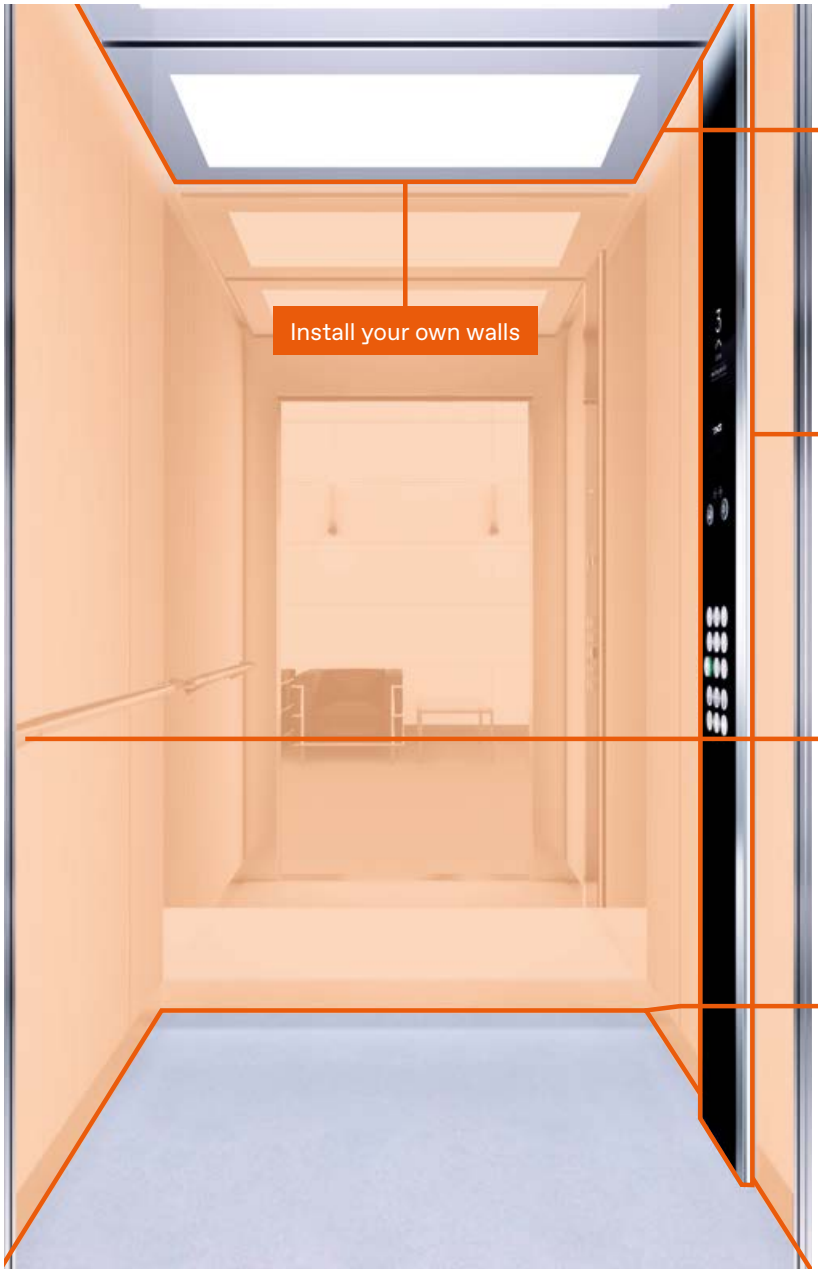
Ceiling
Mirror
Operating panel
Rear wall
Skirting
Floor



A design line

Custom-fit solutions: custom cabin

The A design line offers a custom cabin option for synergy 300 and evolution 200/300. This means, if you prefer to personalise the cabin yourself, we can fulfill your needs by delivering a cabin with no wall finish. Choose the ceiling design and car operating panel within design line A and optionally complete your cabin with handrail and flooring from the same design line.



Choose a ceiling from the A design line

Choose a COP from the A design line

Choose either a handrail from the A design line or install your own handrail

Choose either flooring from the A design line or install your own flooring

This option is available for the A design line in synergy 300 and evolution 200/300.

Custom-fit solutions: custom printed glass

Customise the walls of your elevator with glass walls in the colour of your choice or with an image that is digitally printed onto the glass wall. This allows you to take advantage of the opportunities the elevator offers for showcasing your brand. We bring your ideas to life. Consult your TK Elevator sales representative for detailed information on custom printed glass designs.

Within the A design line this option is available for synergy 300 and evolution 200/300.

Custom-fit solutions: panoramic rear wall and full panoramic cabin

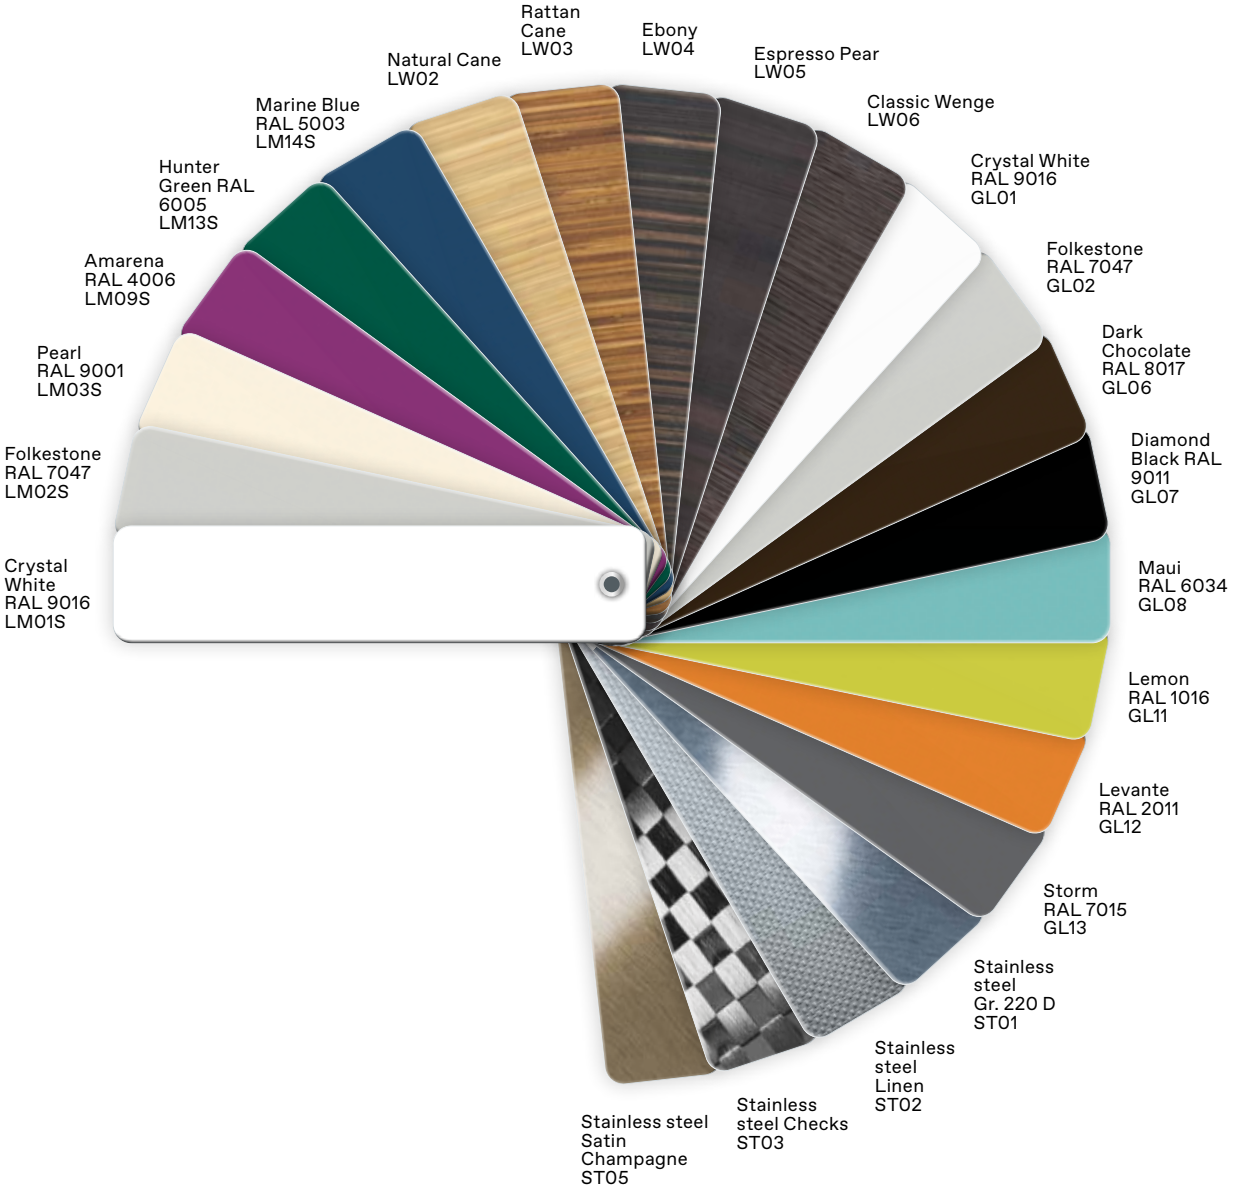
Enlarge your views with a panoramic rear wall, always combined with the elegance of stainless steel frames. A panoramic rear wall gives the cabin spaciousness and allows natural light to enter.

Full panoramic cabins have 3 glass walls combined with elegant stainless steel frames. All-round visibility, brightness and optical enlargement of the cabin – the advantages speak for themselves.

Within the A design line the panoramic rear wall and full panoramic cabin are available for evolution 200 and 300. For synergy 300, a panoramic rear wall is available.

Wall materials

Choose from a full palette of different colours and materials. Stainless steel in four different finishes, colourful or wooden laminates, or decorative glass: the A design line provides high-grade materials for exclusive and durable design.



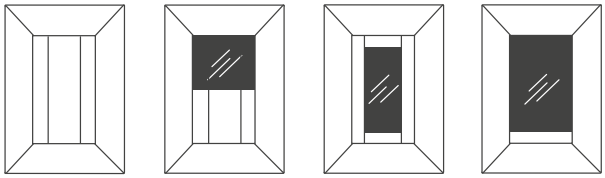
Legend:
LM_S: Laminate shiny, plain colour
LW: Laminate matt, plain colour
GL: Decorative glass, plain colour
ST: Stainless steel

Mirrors, skirtings, handrails and bumpers

Mirrors

Integrated mirrors in the rear or side walls (double entrance), make the cabin feel more spacious and create appealing ceiling light reflections. In the A design line, you can also choose a cabin without mirrors.

Options



Without mirror | Full-width, mid-height | Partial-width, partial-height* | Full-width, full-height

*Exclusively available for evolution

Skirtings

Floor and ceiling skirting prevent damage of the bottom of walls and flooring edges. The skirting provides wall panels with long-lasting, high-quality finishes. Skirtings in synergy are available in aluminum, evolution in stainless steel.

Aluminum/Stainless steel, Silver

Stainless steel, Black

Aluminum/Stainless steel, Champagne

Handrails

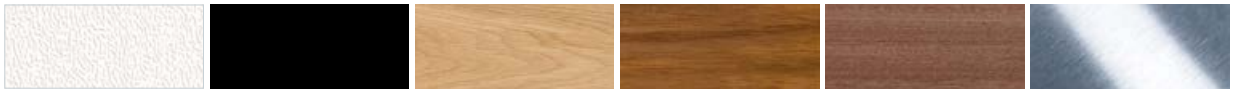
Curved ends, silver or black stainless steel finish with sloped fitting. Place handrails on rear or side walls.

Stainless steel Satin Silver, sloped fixing

Stainless steel Satin Black, sloped fixing

Bumpers

Protect your cabin walls with bumpers in PVC, stainless steel or wooden material.



PVC Snow White | PVC Black* | Wooden European Oak | Wooden Bosse Cedar* | Wooden Sapelly | Stainless steel Gr.220D

*Exclusively available for evolution

Ceilings

Choose from a wide range of ceiling designs and colours. The printed area reaches right to the ceiling edges. Enhance the impact of the LED lighting by adding a ceiling surrounding back light. You can also install a ceiling from other suppliers.

Car Operating Panels, COP

Light Moon
The compact and functional design of the Light Moon COP offers a convenient version of Moon COPs for simple projects with limited and highly functional requirements. It includes a 3,5'' TFT display.

- Max. stops / auxiliary buttons: from 7 / 4 to 9 / 2

Moon
The minimalist design of the Moon COP perfectly balances functionality and quality ensuring an affordable cabin aesthetic. It is available in stainless steel or white tempered glass with integrated 3,5" TFT display.

- Max. stops / auxiliary buttons: 12 / 6

Edge
The contemporary design of the Edge COP combines stainless steel and glass to provide stylish robustness. It includes an integrated 7" TFT display.

- Max. stops / auxiliary buttons: 15 / 6 or 20 / 8 according to dimensions

Alto
The clean design of the Alto COP provides the cabin with a discreet touch of elegance. With black safety glass finish and integrated 7" TFT display.

- Max. stops / auxiliary buttons: 15 / 6 or 20 / 8 according to dimensions

Edge high
With its rationalist design and durable finish, the Edge high COP combines usability with elegance and unsurpassed style. It includes an integrated 7" TFT display.

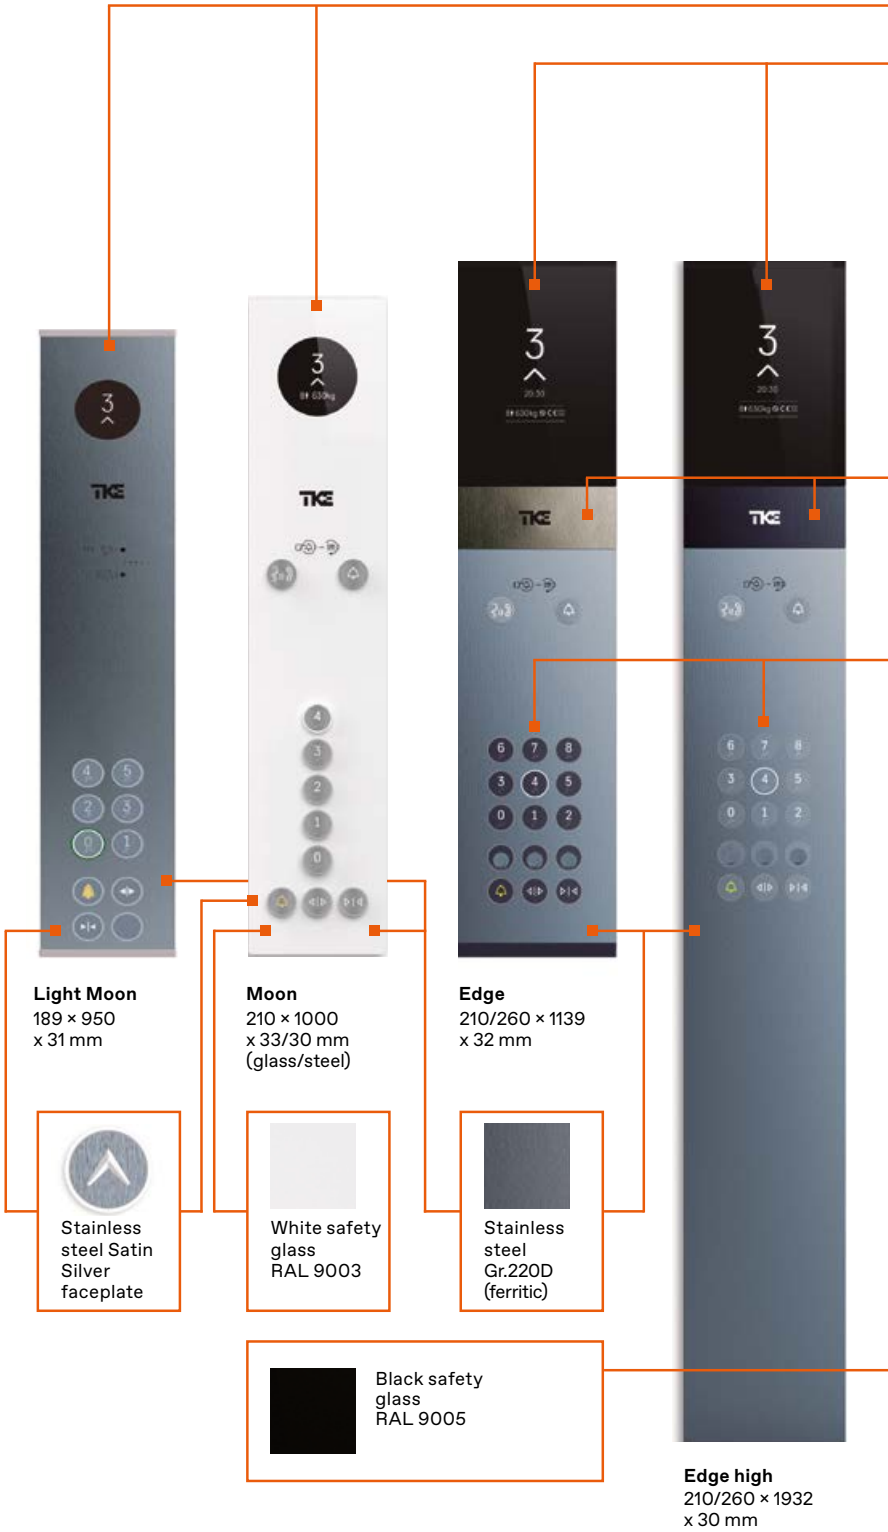
- Max. stops / auxiliary buttons: 15 / 6 or 20 / 8 according to dimensions

Alto full height
Impressive design for a superior ambiance. The Alto full height COP in black safety glass with stainless steel decorative side stripe includes an integrated 7" TFT display.

- Max. stops / auxiliary buttons: 15 / 6 or 20 / 8 according to dimensions

IL variable
The pure and clean design of the IL variable COP easily integrates in any ambiance, ensuring timeless style with long-lasting steel finish. It includes an integrated 7" TFT display.

- Max. stops / auxiliary buttons: 40 / 8 according to dimensions



Elegant vertical car operating panels make navigation and orientation within the elevator easy and convenient.

Step Classic LOP
110 x 280 mm

Blueton
push-button

Blueton LOP
110 x 280 mm

Integrated position and direction indicator with stainless steel faceplate, gong, surface-mounted on wall or door frame. Optional key switch. Several colours available for push-button aknowledgement and background lighting.

Rectangle or oval stain-less steel faceplate, wall-mounted. Optional direction arrow or key switch.

Landing Direction Indicator Panels, LDIP

Positioned on the door jamb or side wall.

LDIP 50-51
91 x 101 x 21 mm

LDIP 50-51*,
white

LID 31*
67 × 160 × 21 mm

Elegant, contemporary LED indicator panel for indoor surface-mounted installation on the landing. Neutral look with glass or steel faceplate.

*Only available in F design line

Positioned on the door frame.

Arrow

LIDC 31
40 × 120 × 2 mm

LED arrow direction indicators are visible from the elevator car and from the landing.

Landing Indicator Panels, LIP

To make orientation easier, the display provides users with relevant information while they wait for the elevator. Positioned above the door or on the wall.

LIP 50
261 × 91 × 21 mm

Surface-mounted installation on the door lintel or on the wall. Displays floor information and arrow direction indication. Black safety glass with white lettering.

LIP, LCD Black Line
280 x 110 x 70 mm

Wall-mounted Landing Indicator Panel with 16-segment LCD display, including gong. Stainless steel cover plate. Available in horizontal or vertical designs, rectangular shape. Blue or black background. Can be installed above or next to the landing door.

SlimLIP Black Line
280 x 100 x 26 mm

Surface-mounted Landing Indicator Panel with 16-segment LCD display, blue or black background. Stainless steel body. It includes a gong and is installed above or next to the landing door or in the shaft front door. Available in horizontal or vertical design.

Standards and options

Moon, Edge, Edge high, Alto, Alto full height

Standard
- Surface mounted
- Hinged opening, easy maintenance
- Overload indicator
- Emergency call system
- DB Dot Button design line with Braille lettering and stainless steel faceplate
- Round green frame around main floor push-button acc. EN 81-70
- Buttons for door open and close
- Visual and audible confirmation of call

Optional
- Voice floor announcement
- Key and Eurokey switches
- Double-click call cancellation
- Selective door opening
- Courtesy COP LED backlighting, for Edge high and Alto full height

IL variable

Standard
- Flush mounted
- Variable configuration
- Overload indicator
- Emergency call system
- DB Dot Button design line with Braille lettering and stainless steel faceplate
- Door close push-button

Optional
- Door open push-button
- Round green frame around main floor push-button acc. EN 81-70
- Key switches
- Double-click call cancellation
- Selective door opening
- Blueline LCD display in combination with Step or Blueton push button (stainless steel look)

Stainless steel Gr. 220D

VB, Vandal-resistant button

VB Push-button series

Stainless steel Black

The VB push-buttons series introduces round vandal-resistant (IPX3) buttons with tactile white characters and white LED lighting for confirmation call. It is available in black stainless steel front plate with metal ring. The VB series complies with EN81-70:2018 and EN81-71:2018, Category 1.

Double Car Operating Panel (COP)

For large cabins the installation of two COPs is beneficial and increases the comfort for the passengers, especially during peak hours, when the cabin can be crowded with people. According to the accessibility regulation EN81-70:2018, a double COP makes it easier for people with disabilities to use the elevator.

Please consult your TK Elevator sales representative about specific restrictions for these configurations.
